CM3191: Experiment 3: Grignard Synthesis of Linalool (Group)

Assignment Guidelines: Video Presentation & Submission Details

1. Overview & General Requirements

- **Duration:** 5 minutes maximum for pairs; 7 minutes maximum for 3-member group, students must present with roughly equal speaking time.
- **Recording Format:** Recorded via NUS Zoom in a single continuous take (no video editing, splicing, or stitching).
- **Setup:** All students must present with webcams on. One student shares full-screen slides and records (Cloud or Local), ensuring both the shared slides and active speaker camera feeds remain clearly visible.

2. Presentation Content & Structure

Manage your presentation time strategically. Rather than reading extensive data lists, prioritize clarity, visual annotation, and chemical reasoning.

Section	Key Focus Areas
1. Introduction & Mechanism	• Synthesis target and experimental objectives. • Step-by-step curved-arrow mechanism and key reaction considerations.
2. Results & Characterization	• Key spectral evidence (^{1}H NMR, IR, TLC) confirming product formation. • Evaluation of product purity and isolated yield.
3. Discussion & Takeaways	• Reflection on key learning points from this experiment.

3. Submission Details (Canvas)

Submit deliverables via Canvas under the assignment portal. Tasks are divided among group members to prevent duplicate/overwritten submissions:

- **Member 1: Video Presentation**

- **Deliverable:** MP4 file or direct NUS Zoom Cloud recording link (viewable within NUS).
- **File Name Format:** [Name1]_[Name2]_Video.mp4

- **Member 2: Slide Deck & Appendix**
  - **Deliverable:** Consolidated PDF containing presentation slides followed by an Appendix.
  - **Appendix Contents:**
    1. Fully processed ^{1}H NMR spectrum (calibrated to residual $CHCl_3$ at 7.26 ppm, plotted from 10.0 to −0.5 ppm, with integrals and peak picking).
    2. Fully processed IR spectrum with major bands labeled.
    3. Scanned raw experimental data sheets.
  - **File Name Format:** [Name1]_[Name2]_Slides.pdf

Note: For groups of 3, Member 3 does not need to submit a separate file on Canvas.

4. Assessment Scheme (Total: 100 Marks)

Criteria	**Marks**
1. Introduction & Mechanism	20
2. Results, Characterization & Discussion	50
3. Delivery & Teamwork	20
4. Slide Quality & Appendix	10
Total	100
